

Team Contributions: Final Software Engineering

Team #16, The Chill Guys
Hamzah Rawasia
Sarim Zia
Aidan Froggatt
Swesan Pathmanathan
Burhanuddin Kharodawala

This document summarizes the contributions of each team member for the final demonstration and documentation. The time period of interest is the time between Rev 0 and the Final documentation; the contributions prior to Rev0 are NOT included.

1 Team Meeting Attendance

[For each team member how many team meetings have they attended over the time period of interest. This number should be determined from the meeting issues in the team's repo. The first entry in the table should be the total number of team meetings held by the team. —SS]

Student	Meetings
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the counts can be provided here. —SS]

2 Supervisor/Stakeholder Meeting Attendance

[For each team member how many supervisor/stakeholder team meetings have they attended over the time period of interest. This number should be deter-

mined from the supervisor meeting issues in the team’s repo. The first entry in the table should be the total number of supervisor and team meetings held by the team. If there is no supervisor, there will usually be meetings with stakeholders (potential users) that can serve a similar purpose. —SS]

Supervisor’s Name: [fill in this information]

Student	Meetings
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the counts can be provided here. —SS]

3 Lecture Attendance

[For each team member how many lectures have they attended over the time period of interest. This number should be determined from the lecture issues in the team’s repo. You can find the number of lectures in the time period of interest by looking at the [Google calendar](#) for the capstone course. —SS]

[NOTE: There will be approximately 1 lecture between the Rev0 and Rev1 demos —SS]

Student	Lectures
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the lecture attendance can be provided here. —SS]

4 TA Document Discussion Attendance

[For each team member how many of the informal document discussion meetings with the TA were attended over the time period of interest. —SS]

TA’s Name: [fill in this information]

Student	Lectures
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the attendance can be provided here. —SS]

5 Commits

[For each team member how many commits to the main branch have been made over the time period of interest. The total is the total number of commits for the entire team since the beginning of the term. The percentage is the percentage of the total commits made by each team member. —SS]

Student	Commits	Percent
Total	Num	100%
Name 1	Num	%
Name 2	Num	%
Name 3	Num	%
Name 4	Num	%
Name 5	Num	%

[If needed, an explanation for the counts can be provided here. For instance, if a team member has more commits to unmerged branches, these numbers can be provided here. If multiple people contribute to a commit, git allows for multi-author commits. —SS]

6 Issue Tracker

[For each team member how many issues have they authored (including open and closed issues (O+C)) and how many have they been assigned (only counting closed issues (C only)) over the time period of interest. —SS]

Student	Authored (O+C)	Assigned (C only)
Name 1	Num	Num
Name 2	Num	Num
Name 3	Num	Num
Name 4	Num	Num
Name 5	Num	Num

[If needed, an explanation for the counts can be provided here. —SS]

7 Team Charter Trigger Items

The team’s quantified triggers were established to maintain accountability and consistent progress throughout the project lifecycle. These triggers included a limit of no more than two unexcused absences per term, a requirement for each member to maintain regular commit history and active participation in issue management, and a mandatory peer-review process for all work prior to final submission.

To date, there have been no documented violations of these triggers; in instances where a team member could not attend a meeting or fulfill a specific rule, they proactively informed the group with a valid justification, ensuring continuous alignment. However, as the project entered its final stages, the team identified that the “regular commit” trigger was structurally weak and ambiguous. It incorrectly assumed that project distribution was measured solely through code contributions, failing to account for critical non-technical deliverables such as the project poster and the final presentation slideshow.

To address this, the team held a meeting to revise the trigger to encompass regular contributions to all project facets. This updated metric now explicitly includes commits, documentation, and presentation materials. The team will continue to monitor these contributions through the final stretch of the capstone to ensure equitable workload distribution and make further adjustments as necessary.
